Five Steps for Food-Safe Taste Testing

Lesson Overview

**Lesson Participants:** School Nutrition Assistants/Technicians

**Type of Lesson:** Short face-to-face training session

**Time Needed to Conduct the Lesson:** 15 minutes

**Lesson Description:** This lesson explains the importance of using food-safe taste testing to assure quality standards are met for customers. A practice-based activity is used to demonstrate the two-spoon method for food-safe taste testing. The lesson is designed for managers to teach school nutrition assistants/technicians.

**Lesson Objectives:**
At the end of this lesson, the participant will be able to:
1. Identify why proper taste testing is important to food safety.
2. Demonstrate how to properly taste food during preparation.

Get Ready to Train

The format for the *No Time to Train* lessons includes an overview, preparation checklist, lesson at a glance with timeline for conducting the lesson, reference, and an instructor’s script. The manager/instructor will use the script to present the lesson to the participants. The script gives directions to the manager/instructor—**DO, SAY, ASK, LISTEN, AND ACTIVITY**—to deliver the lesson.

No special audiovisual or electronic equipment is needed to conduct the lesson. The lesson can be presented in the cafeteria, media center, or classroom.
**Preparation Checklist**

**Directions:** Use the Preparation Checklist to prepare for the training session. Track your progress by checking off tasks as they are completed.

#### Gather Materials

**Materials Needed:**

- Instructor’s Script
- Handout: Five Steps for Food-Safe Taste Testing (one for each participant)
- For Demonstration: Use sample pan of food or the graphic illustration provided in lesson.
- Container of spoons or disposable spoons, handles up (two spoons for each participant)
- Small plates or bowls if food is used (one per participant)
- Pencils (one for each participant)
- Session Evaluation form (one for each participant)

#### Prepare for Lesson

**Before the Training:**

- Make copies of Handout: Five Steps for Food-Safe Taste Testing (one for each participant).
- Make copies of Session Evaluation form (one for each participant).

**On Training Day:**

- Place pencils on tables (one for each participant).
- Prepare pan of food for tasting or use the graphic illustration provided. Use safe holding practices until training time.
- Distribute handout to each participant.

**On the Instructor’s Table:**

- Instructor’s Script
- Handout: Five Steps for Food-Safe Taste Testing
- Pan of food for tasting or graphic illustration
- Container of spoons, handles up
- Small plates or bowls if food is used
- Session Evaluation forms

Note to Instructor:
Conduct this lesson away from the food preparation area.

Emphasize that taste testing is not eating.

Check with your state or local health department to see what additional resources may be available. It is likely that the governing agency will have written guidelines with wording such as, “A food employee shall not use a utensil more than once to taste food that is to be sold or served.”

Instructor’s Script

SAY:
It may sound obvious, but taste testing food during preparation is necessary to ensure that foods taste good. How else can we be sure that the food we serve our customers is delicious? Even when we use standardized recipes, we should always taste test for quality assurance. When we do our taste testing, it is important that we do so in a manner that keeps the food safe from contamination.

The two-spoon method allows tasting to be done in a sanitary manner.

Generally spoons are used; however, smaller disposable spoons may also be used.

There are two reasons why we use the two-spoon method.

We refer to one of the spoons as a sampling spoon. This is the spoon that is used to secure a sample of food from the pot or pan of product being tasted.

The second spoon is the tasting spoon. This is the spoon that comes in contact with the mouth of the taster.

In order to keep the sampling spoon uncontaminated, the sampling spoon and the tasting spoon must never come into physical contact with one another. The same is true when a small plate or bowl is used in the process. The sampling spoon must never touch anything but the food.

There are two reasons why we use the two-method.

First, it often takes more than one sample to determine if the food is acceptable. By using two spoons, repeated samples may be tasted without the danger of contaminating the food.

The second reason is that having two spoons reminds the taster that the contaminated tasting spoon must never be used to sample from the pan. In other words, this method helps us to assure that we are tasting foods in the safest manner.

Let’s practice the two-spoon method of food-safe taste testing.

DO:
Distribute Handout: Five Steps for Food-Safe Taste Testing, two spoons, and a small plate or bowl to each participant. Position the pan of food to be tasted in a place convenient for all participants. If a food demonstration is not used, another option is to use the graphic illustration.

ASK:
May I have a volunteer to read step 1 from the handout?
LISTEN:
Listen as step 1 is read aloud. It says:
1. Take a sample of the food from the pan using the sampling spoon.

DO:
Once the step is read, demonstrate the step.

Use two spoons, a sampling and a tasting spoon. Use the sampling spoon to take a small amount of food from the container. To prevent contamination, never taste directly from a sampling spoon or any utensil used in preparation or service.

ASK:
May I have a volunteer to read step 2 from the handout?

LISTEN:
Listen as step 2 is read aloud. It says:
2. Turn or step away from the container of food.

DO:
Once the step is read, demonstrate the step.

Turn away from the pan or take a step back prior to transferring the food from the sampling spoon to the tasting spoon. This is an important step. Standing away from the pan of food being sampled prevents contamination during the transfer or tasting. When standing over or near the pan of food, contamination will occur if the spoon drips into the product.

ASK:
May I have a volunteer to read step 3 from the handout?

LISTEN:
Listen as step 3 is read aloud. It says:
3. Transfer the food from the sampling spoon to the tasting spoon or to a small plate or bowl.

DO:
Once the step is read, demonstrate the step.

This step can be tricky because the food is poured or dropped from the sampling spoon to the tasting spoon. The two spoons may never touch one another. This step is most easily done with the smallest adequate sample. Remember, do not ever allow the sampling spoon to touch the tasting spoon, small plate, or bowl; and do not allow the food to fall back into the pot or pan.
ASK:
May I have a volunteer to read steps 4 and 5 from the handout?

LISTEN:
Listen as steps 4 and 5 are read aloud. They say:
4. Taste the food.

5. Transport the used spoons, plates, or bowls to the dishwashing area immediately after tasting. If disposables are used, discard immediately.

DO:
Once the steps are read aloud, demonstrate the steps.

Taste the food. Transport the used spoons, plates, or bowls to the dishwashing area immediately after tasting. If disposables are used, discard immediately.

SAY:
Let’s try these steps together. I will read the steps aloud, and each of you will practice food-safe taste testing.

DO:
Ask participants to take two spoons, one for sampling and one for tasting and a plate or bowl. Practice taste testing using the proper procedures. Read each of the steps aloud as participants practice each step.

ACTIVITY:
Participants practice proper food-safe taste testing as instructor reads each step.

ASK:
Why do we taste food?

LISTEN:
Listen to responses. Key concept: Taste testing food during preparation is necessary to ensure that foods taste good.

ASK:
Who can summarize why it is necessary to use proper procedures when taste testing foods?

LISTEN:
Listen to responses. Key concept: It is important that we taste test in a manner that keeps the food safe from contamination.
ASK:
Do you have any other comments or questions about food-safe taste testing?

LISTEN:
Listen to individual responses. Answer questions to the best of your ability. If there are questions you can’t answer, tell participants you will find out the answer and let them know later. If you need assistance in finding answers, please call the National Food Service Management Institute at 800-321-3054.

SAY:
Taste testing food during preparation is necessary to ensure that foods taste good. We should taste test for quality assurance even when standardized recipes are used. It is important to taste food in a manner that keeps the food safe from contamination. Remember that tasting is not eating!

DO:
Distribute the Session Evaluation form.

SAY:
Thank you for participating in the lesson today. Please take a couple of minutes to complete the Session Evaluation form. Thank you for your input.
Handout
Five Steps for Food-Safe Taste Testing

1. Take a sample of the food from the pan using the sampling spoon.

Use two spoons, a sampling and a tasting spoon. Using the sampling spoon, take a small amount of food from the container. To prevent contamination, never taste directly from a sampling spoon or any utensil used in preparation or service.

2. Turn or step away from the container of food.

Turn away from the pan or take a step back prior to transferring the food from the sampling spoon to the tasting spoon. This is an important step. Standing away from the pan of food being sampled prevents contamination during the transfer or tasting. When standing over or near the pan of food, contamination will occur if the spoon drips into the product.

3. Transfer the food from the sampling spoon to the tasting spoon or to a small plate or bowl.

This step can be tricky because the food is poured or dropped from the sampling spoon to the tasting spoon. The two spoons may never touch one another. This step is most easily done with the smallest adequate sample. Remember, do not ever allow the sampling spoon to touch the tasting spoon, small plate, or bowl; and do not allow the food to fall back into the pot or pan.

4. Taste the food.

5. Transport the used spoons, plates, or bowls to the dishwashing area immediately after tasting. If disposables are used, discard immediately.

Remember taste testing is not eating!

Instructions:
Completely fill in the circle of your answer. Use a #2 pencil.
Please select only one response for each statement. Do not fold or crease this sheet.

Title of Meeting: ____________________________  Trainer’s Code: ________________
Session Topic: ______________________________
Date: _______________ Time Slot: __________ Location: ______________ Length of Event (hrs/min): ________

Attendee Status:
☐ District director  ☐ Major city director  ☐ Private consultant/trainer
☐ State agency staff  ☐ Site-level manager  ☐ Foodservice assistant
☐ Educator  ☐ Other (please list) ________________

Reaction to this Session
Please read the following statements related to the session. Rate your level of agreement by using the scale 5 (Strongly Agree) to 1 (Strongly Disagree).

1. The session objectives were clearly presented.  (5)  (4)  (3)  (2)  (1)
2. The session objectives were achieved.  (5)  (4)  (3)  (2)  (1)
3. I can apply what I learned in this session to my job.  (5)  (4)  (3)  (2)  (1)
4. Attending the session increased my skill on the topic.  (5)  (4)  (3)  (2)  (1)
5. Attending the session increased my knowledge on the topic.  (5)  (4)  (3)  (2)  (1)
6. I would recommend this session to others.  (5)  (4)  (3)  (2)  (1)
7. Overall, the session met or exceeded my expectations.  (5)  (4)  (3)  (2)  (1)
