Building the Future Through Child Nutrition

The National Food Service Management Institute was authorized by Congress in 1989 and established in 1990 at The University of Mississippi in Oxford and is operated in collaboration with The University of Southern Mississippi in Hattiesburg. The Institute operates under a grant agreement with the United States Department of Agriculture, Food and Nutrition Service.

PURPOSE
The purpose of the National Food Service Management Institute is to improve the operation of child nutrition programs through research, education and training, and information dissemination.

MISSION
The mission of the National Food Service Management Institute is to provide information and services that promote the continuous improvement of child nutrition programs.

VISION
The vision of the National Food Service Management Institute is to be the leader in providing education, research, and resources to promote excellence in child nutrition programs.

EXECUTIVE SUMMARY

This project was developed to accomplish the following objectives:

- Identify job duties and responsibilities based on a national collection of job
descriptions of child care center directors and staff participating in the Child and
Adult Care Food Program (CACFP);
- Perform content analysis of the job descriptions into duties and responsibilities for
child care providers;
- Confirm job duties and responsibilities, and then group them into functional areas
based on parameters within the food program (meal planning, food purchasing, food
preparation, service, nutrition education, wellness environment best practices, and
special needs); and
- Validate the job duties and responsibilities of child care center directors and staff.

To accomplish the project objectives, two panels of exemplary CACFP professionals
participated in a work-group session and a national review panel to systematically confirm,
combine, and create descriptions for job duties and responsibilities for child care center directors
and staff participating in the CACFP.

Seven CACFP professionals were chosen to participate in an expert panel, work-group
session to accomplish the following: review the wording of each job duty and responsibility,
classify statements under the appropriate research-based functional area; and group similar
statements into functional areas. Expert panel members reviewed the results of the work-group session using a guided evaluation form. Then, members confirmed the list of job duties and responsibilities.

The modified list of job duties and responsibilities was drafted using the suggestions of expert panel members. A final guided evaluation was completed by a review panel of CACFP personnel, with a response rate of 22.9%. A review and contextual analysis of the national review panel responses resulted in the following actions being taken:

- The number of functional areas was decreased from eight (8) to seven (7);
- The number of job duties and responsibilities was increased from 31 to 59;
- The food safety and sanitation functional area and the health and safety functional areas were combined; and
- A set of definitions for each functional area was developed.

The information gained from this project will be used to provide structure for the development of job descriptions and training modules. It will also be used to identify job functions, training needs, and skills necessary for child care providers.
